

## NWIRP/NG Site-June 22, 2015 Quarterly Meeting Agenda

### 1. ONCT Effectiveness

- NG short overview of the effectiveness evaluation
- BWD Questions regarding DEC evaluation of NG work effort: The elevation, number and location of the data points used in the evaluation appear limited and questionable. When the DEC approved the work plan for this study, what was its basis for approving the data points?  
The data used in the evaluation was from 2011 – 2013. The Navy data for VPBs 142, 144, 156 and MW RE108D2 was obtained after the Arcadis data. How did the DEC evaluate and dismiss the Navy data as it relates to the ONCT effectiveness in preventing continuing contaminant migration off-site?
- Additional work being performed by Navy relative to the ONCT

### 2. Status of additional “Hotspot” work

#### Work by Navy

- Plant 6 Pilot Study
- Additional delineation
- Plans for addressing contamination not captured by 6-2

#### Work by NG

- Status of NG workplan required pursuant to April Consent Agreement

#### NG/Navy coordination on Hotspot work

3. Disposition of treated water if well 6-2 utilized to capture mass of the hotspot
4. Discussion of potential for BWD to lease wells to NG or Navy at Plants 4,5,6 as treatment wells taken off-line as supply wells
5. Status of sentinel well installation
6. DEC follow up regarding 1,4-dioxane, perchlorate and radium 226 and 228 sampling performed to data and to be performed
7. Data sharing/timing
8. Community outreach
  - Drilling
  - Next RAB meeting
9. Discussion with NYSDEC contractor for Saladino Study (what are you guys calling this)
